

**Name: Tarun Kumar Arya**

**Mentor Name:**

**Date: 17th January 2024**

**Task Number: 02**

**UMEED: A DROP OF HOPE  
TASK 02 WEEKLY REPORT  
ENVIRONMENT WEEK: TREE PLANTATION DRIVE**

**INTRODUCTION:**

I volunteered in the PAN INDIA INTERNSHIP conducted by UMEED NGO. The second task allotted to me is to make a presentation based on the topic “Climate Change” and present it to a group of 5-8 people and spread awareness amongst them about the importance of Forests and their conservation. My task included organising a tree plantation drive and Planting at least ten trees in Forest/Open ground/Road divider/ Park.

**IT'S IMPORTANCE :**

Tree plantation drives are crucial as they help in improving air quality, reducing carbon dioxide levels thus combating climate change, preventing soil erosion, supporting biodiversity, and providing social benefits like enhancing the aesthetic value of an area and promoting community engagement.

**MY STRATEGY / TECHNIQUE :**

I planned to visit our nearby Harkesh Nagar park for tree plantation and also to raise awareness about planting trees.

**HOW I DID IT?**

First, I made a presentation on Climate change and presented it to my friends and my family. Then, I bought some plants from a nearby plant nursery. I planned to plant these trees in the nearby Harkesh Nagar Park and the garden situated in my home. My father also helped me with the tree plantation process.

**WHERE I DID IT?**

I visited the nearby Harkesh Nagar Park and the garden in my home.

#### FINAL RESULT :

In conclusion, the tree plantation drive we undertook was a resounding success, marking a significant step towards environmental conservation and community involvement. Through our collective efforts, we have managed to plant a substantial number of trees, which will not only enhance the local biodiversity but also contribute to combatting the effects of climate change through carbon sequestration. This initiative has not only beautified our surroundings but has also fostered a sense of responsibility and unity among participants towards environmental stewardship. As these trees grow, they will stand as a testament to our commitment to a greener, healthier planet. We are hopeful that the positive impact of this drive will resonate in our community for years to come, inspiring future generations to continue this vital work of nurturing and preserving our natural environment.
